Digital Business: our vision and capabilities

From the idea to the implementation of systems, we facilitate the digitization of companies in the sheet metal industry

We have a holistic and integrated vision of digital factory systems. We believe that all actors should cooperate with each other in an open manner.

Our in-depth knowledge of the sheet metal industry makes us the perfect partners to create systems that really help accelerate the digitization process for companies in the sheet metal cutting industry.

Digital Business: our vision and capabilities

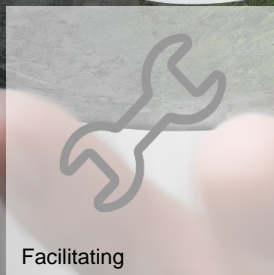

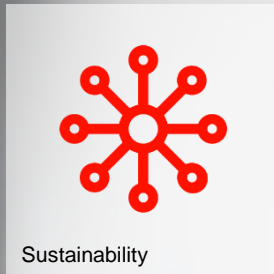

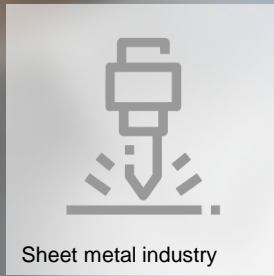

Specialized in the sheet metal industry

Our industry experience enables us to conceive, design, and develop systems that include the critical capabilities for the sheet metal industry. Many of our software engineers have over a decade of experience in the sector.

Digital Business: our vision and capabilities

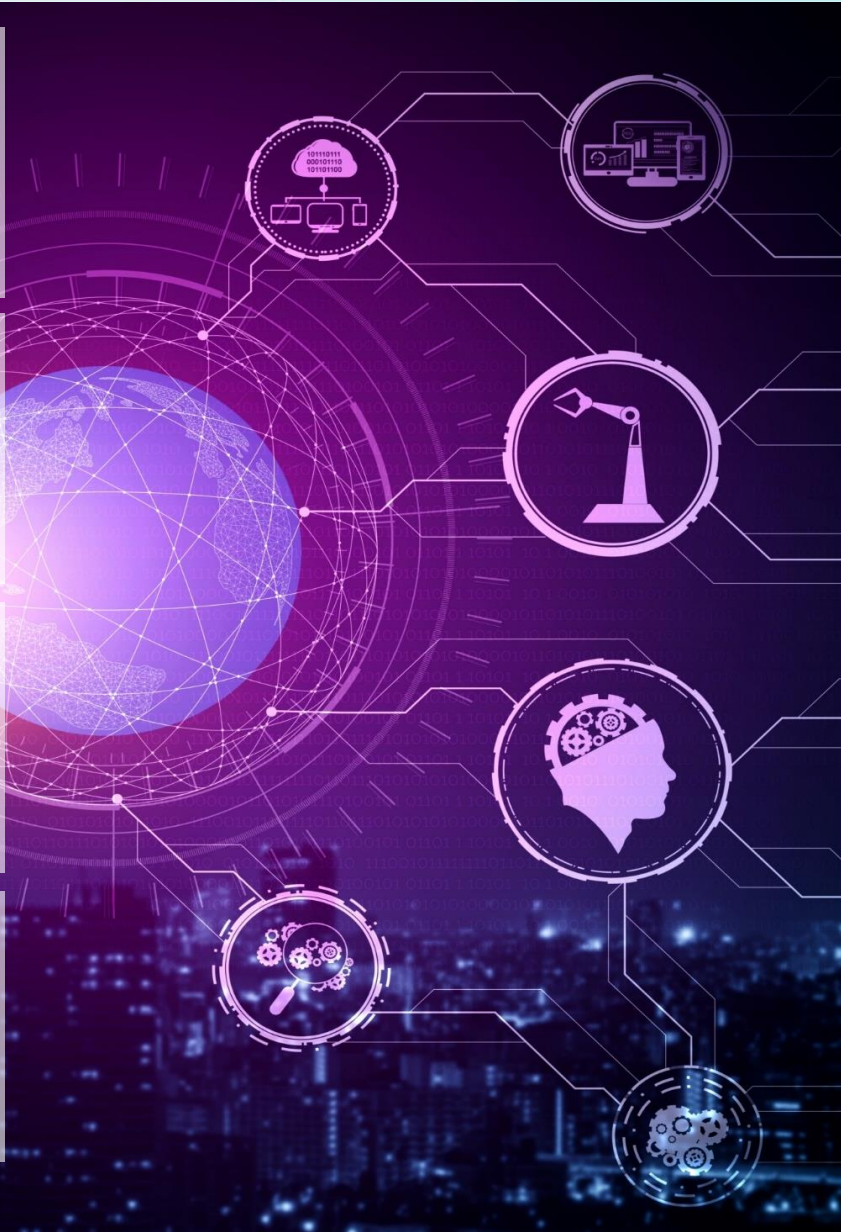

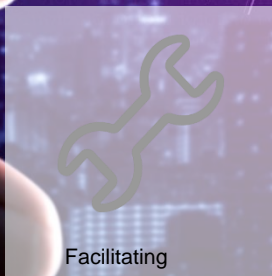

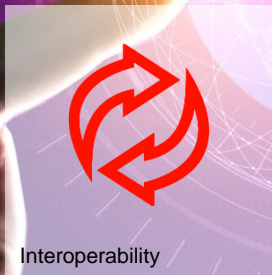

Long-term sustainability

Building systems that are robust and sustainable ensures their long-term future. This is a crucial element to provide the ability to expand functions and adapt to new realities as they appear in the sector.

Digital Business: our vision and capabilities

Interoperability with any system for any machine

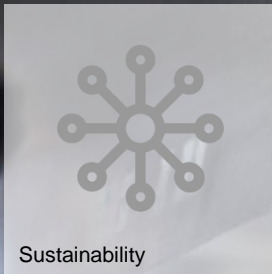

To make the digital factory a reality for companies in the sheet metal sector, it is important that the software can interface with other pre-existing systems regardless of the manufacturer. This gives end users full control over their business.

Facilitating

Facilitating people's daily work

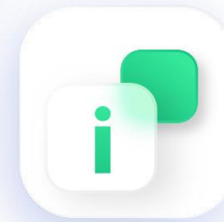

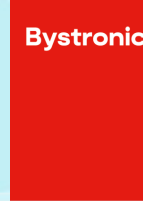

Our systems are designed to enhance the capabilities of their users. Digitization must free users from repetitive tasks, enabling them to focus on the activities in which they add value, contributing to faster decision making.

Germany: the first BySoft Suite mover Stern Edelstahl GmbH

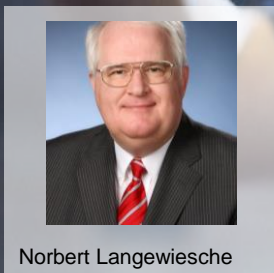

Michael Stern

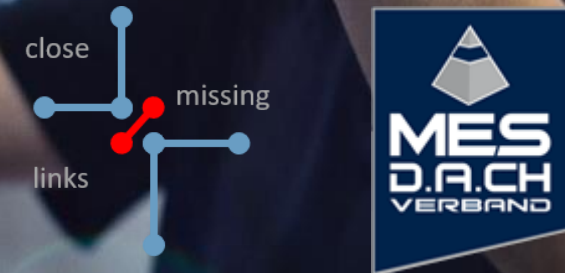

Florian Rabenbauer

Ira Shanker

Norbert Langewiesche

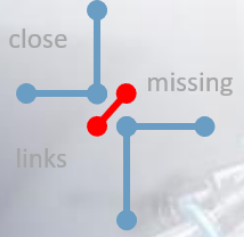

- Starting: 1701
- Employees: 52
- Stainless Steel Sheet and Tube Processing, specially for Pharma-, Chemical- and Food Customers
- Strong focus on paperless processing
- Digitalisation based on [Microsoft 365 Business Central](#) [BySoft Suite](#)
- One Bystronic Fibre Laser and 2 digitized Bystronic Press Brakes operating by BySoft Suite

- The Coaches:
 - The Supply Chain 4.0 IG and Tech to select online platform for machinery construction
 - Presented by Norbert Langewiesche and Ira Shanker
 - Member of MES D.A.CH Association Germany

- Our Goal:
 - „Design to Pay Processing“ > First Class Supply Chain 4.0
